Information /Decision

Item No.	Discussion Summary
1	Technology Stack Decision: Following a discussion of potential backend technologies (Spring Framework, Spring MVC, Spring Boot), the final technology stack was decided as follows: NextJS (Admin Dashboard SPA), Spring Boot (Backend App Server), Firebase (Database), React Native (Mobile Apps for iOS/Android), and Google Maps API.
2	UX/UI Scope Definition: The scope of UX/UI responsibilities will encompass system design, wireframing, mockups, prototyping, and defining user workflows.
3	Project Management Tool: Jira will serve as the project management platform, administered by Nextway. All team members will receive access to manage tasks, sprints, and workflows within the designated Jira project.
4	Source Code Management: GitHub was confirmed as the platform for source control, utilizing dedicated repositories.
5	Budget Allocation (10 Million VND): The allocated budget will be directed towards AWS cloud service costs and acquiring an Apple Developer Account. Noted possibility: Mr. Thuan may provide an Apple Developer account, potentially freeing up budget for increased AWS resource allocation.
6	Sprint Cadence: The project will adopt a weekly sprint cycle.

7	Sprint Planning Schedule: Sprint planning meetings will be held weekly on Friday mornings at the Nextway Technology office, commencing with the next meeting on April 11th, 2025.
